SUMMARY

Full-Stack software developer that strives to dynamically enhance mobile-first applications while meeting AODA criteria. Graduated with a certificate from the University of Toronto's Full-Stack Coding Bootcamp, with an evolved skill set in React, JavaScript, Node, back-end Databases, and front-end Frameworks. Aims to give each project its own identity while distributing a flush end-user experience. Excited to contribute a variety of creative skills and become a part of a high caliber team to develop new and exhilarating projects.

TECHNICAL SKILLS

Languages: JavaScript ES6+, Sass, HTML5, CSS3

Database: MongoDB, MySQL

Applications: GitHub, Gitlab, Visual Studio Code, GIT, Heroku, Travis-CI, GitKraken, AWS

Frameworks: React, Node.js, Material Ui, Bootstrap, Mongoose

PROJECTS

Check in / Check out | <https://github.com/HustinKava/checkin-checkout>

- **Summary:** Asset tracking app with real time notifications and validation
- **Role:** Solo project developed independently for Web Production Artists at TVO
- **Technologies:** MongoDB, Express, React, Node, Sass, Heroku, Socket IO

MindShare | <https://github.com/P3TeamTwo/p3> | <https://guarded-dusk-24354.herokuapp.com/>

- **Summary:** Wellbeing app that allows users to track their overall data and input journal events
- **Role:** Responsible for the deployment process. Created the code logic for the user quiz, implemented the unit test and provided the code logic to determine the graph data averages
- **Technologies:** MongoDB, Express, React, Node, Material Ui, Jest, Travis-CI, Heroku, API's

Let's Go Travel Planner | <https://github.com/Mcilhaggis/lets-go-travel-planner> | <https://stormy-springs-60842.herokuapp.com/>

- **Summary:** Travel app that effortlessly creates user itineraries for post COVID vacations
- **Role:** Responsible for creating the Full-CRUD aspect of the app with MySQL and handled the deployment process. Implemented the Dark-Mode feature
- **Technologies:** Node, MySQL, Handlebars, Jest, Heroku, Travis-CI, jQuery, Bootstrap, API's

EXPERIENCE

Web Production Artist TVO

July 2021 – Present
Toronto, ON

Web Solutions

Currently building micro frontend applications with React that are being distributed using module federation as a part of the Web Solutions Components team. Responsible for managing and optimizing current code bases.

Key Accomplishments:

- Successfully met sprint goals by delivering functional components that have been approved by quality assurance analysts

Digital Learning

Coded engaging online courses for elementary school teachers. Developed new interactive learning objects, created new global components for use with the Ontario Ministry of Education's learning activities, and maintained existing JavaScript projects for TVO's elementary department.

Key Accomplishments:

- Built new interactive learning objects with React and Sass that are AODA compliant, and provide function specific feedback to NVDA and VoiceOver users
- Generated application builds using Gulp with versioning and deployed to the npm registry to be globally distributed

Front-End Developer Galaxy Protocol | <https://galaxyprotocol.io>

Jun – July 2021
Toronto, ON

Engaged closely with a design team to effectively create a React based mobile first website for a start-up cryptocurrency organization. Integrated new components for different sections of the web page which were styled with Sass and Material UI.

Key Accomplishments:

- Triumphantly met the targeted web application launch date
- Collaborated with a team of like-minded developers to create an exquisite modern website

EDUCATION

Full-Stack-Developer Bootcamp Certificate: University of Toronto

2020 - 2021
Toronto, ON

A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, JavaScript, jQuery, Node, MySQL, MongoDB, Express, Handlebars & React.

AWS | <https://github.com/HustinKava/aws-training>

2022

Currently expanding my knowledge and analyzing Amazon Web Services using a variety of online courses available.
